

Energetic support in illnesses

During an illness, it is particularly important for a child to be in a pleasant and trouble-free environment, where they can relax and regenerate. Then the self-healing powers of the body – with or without medicine, or alternative healing – become noticeable. If you want to charge your sick child's energy field with positive energies, we recommend the **Angel Aura Essence "Archangel Raphael"**, who is called the "Angel of Healing".

A PRACTICAL EXAMPLE

Situation: Astrid (aged 30) is a children's nurse. She works for a very tolerant doctor and an open matron who have nothing against spraying the Angel Aura Essence "Archangel Raphael" in the children's wards. The nurses soon notice that the children are much more relaxed and balanced when it is Astrid's shift, than on the days when Astrid does not spray. Although some of her colleagues do not believe in angel energies, they start to think about also using the Aura Essence in Astrid's absence.

Explanation: Angel Aura Essences harmonize people's bodies' own energy fields.
